

Survalent Technology

The Company

Survalent Technology makes real-time operational intelligence and control easy. We integrate data from across your network to optimize your operations and help you efficiently make critical decisions that improve reliability and business performance. Our knowledge, experience, and passion encompass every solution we provide to our customers.

For over five decades, Survalent has helped more than 400 utilities use operational data to increase reliability, efficiency and customer service. With proven and reliable solutions such as Supervisory Control and Data Acquisition (SCADA), Outage Management System (OMS), Distribution Management Systems (DMS), Demand Response (DR), Distribution Automation (DA), Substation Automation (SA), and SurvCentral Mobile Applications, utilities transform data into actionable intelligence with Survalent.

Our Vision

We provide our customers an intuitive and user friendly portal for accessing a suite of quality applications to run their daily operations. We offer advanced utility applications and integrate with third party technologies to decrease complexity and optimize productivity.

Operations

Survalent Technology is management owned, with offices in:

- Canada
- United States
- Latin America
- Europe

Our Experience

Survalent Technology has been supplying leading-edge SCADA systems and accessories since 1964. With over 300 man-years of SCADA development experience and a customer retention record that is second to none in the industry, we are the premier supplier of SCADA systems to the electric utility industry.

Survalent Technology partners with utilities across the globe to create mission critical solutions that will achieve the promise of the Smart Grid.

Our Products

- SmartSCADA™ (Supervisory Control and Data Acquisition)
- SmartOMS (Outage Management System)
- SmartDMS (Distribution Management System)
- SmartDA (Distribution Automation)
- SmartDR (Demand Response)
- SmartSA (Substation Automation)
- SurvCentral (Mobile Applications)

Markets Served

- Electric Utilities
- Water Distribution Utilities
- Military
- Oil and Gas Pipeline
- Transportation
- Industrial

Our staff of industry experts understand customer requirements. Our applications provide solutions to customer needs.

With consulting and representation partners throughout the world, Survalent provides unequalled service and support.

The Survalent Solution

Platform: Survalent offered its first Windows based SCADA solution in 1998, and has fielded more than 400 mission critical systems worldwide.

Hardware: Standardized on world-class, tested and proven components to provide a robust platform for service. SmartSCADA™ offers Dell® servers with Intel® processors, running Microsoft Windows Server 2008™. Components you can trust for reliability and best-in-class customer support.

Software: User-friendly, powerful, pre-installed, commissioned and tested, assuring total quality. Survalent SmartSCADA™ software and WorldView Graphical User Interface (GUI) provides unparalleled ease-of-use, yet is feature rich, allowing simplicity up front, but capability as functionality is needed.

Key Applications: A powerful set of more than 40 modular software applications which allows users to take control of their data requirements: AGC, Remote Alarm Annunciation, Load Forecasting, Virtual RTU, and WebSurv for a complete web browser GUI interface.

Open Standards: Survalent implements open standards for data access and control, including: ODBC, OPC, IEC, SNMP, and DNP3.0. Survalent is a member of the MultiSpeak and Open Design Alliance.

Station Controllers: Survalent offers a complete line of Remote Terminal Units (RTUs) for easy integration. The Scout Station Controller™ features multiple IED ports and a database capacity of 16,000 points. The Hunter Station Controller™ features 12 direct AC inputs, with metering and waveform capture on all channels.

Project Management: Survalent provides experienced personnel for project oversight, assuring that requirements are identified, standards are met, and schedules are maintained.

Commissioning: All systems are Factory Acceptance Tested; a guarantee that the system is fully functional and ready for operation. Survalent technical personnel provide on-site commissioning of the system, ensuring the system operates to the customers' satisfaction.

Training: Survalent offers factory training courses year-round for engineers and operators. Regional training sessions are held throughout the world each year, and all courses can be provided on-site.

Support: Survalent offers 24/7 hotline technical support. For customers on software maintenance, on-line software updates, product enhancements, and updated manuals are available on our customer support

Seeking ways to increase customer service and reliability and reduce operational costs through automation? You have arrived at the right place.

For over 45 years, Survalent Technology has provided real-time solutions to our customers to do just that. Our Smart Solutions enable our customers to easily acquire important data for operations in real-time, visualize the data in relation to their systems and leverage it to empower employees to optimize operations and provide better service to their customers and members. Our users like the ease of configuration and straightforward, intuitive interfaces, the ability to start with basic features and add advanced applications as their needs require.

At Survalent, we realize you are making a long-term decision for your real-time automation needs. We view our commitment to our customers a partnership and as such, with our SmartSolutions, we provide the best support in the industry.

Survalent makes real-time operational intelligence and control easy. We integrate data from across your network to optimize your operations and help you efficiently make critical decisions that improve reliability and business performance. Our knowledge, experience and passion encompass every solution we provide to our customers.
